

Alec Romero
Economic Development Research Intern
aromero@crec.net

Alec is from Upland, California and recently graduated from the University of Redlands with a B.S. in Economics and Decision Making where he completed his senior honors thesis entitled Voting in Virtual Worlds: Do Item Prices Matter in Old School RuneScape Voting? He is interested in learning about economic realities and working towards creating an equitable labor market. As his thesis implies, Alec spends his spare time engaged in virtual worlds, normally known as video games, as well as reading dystopian novels. He is currently working on the Credential Engine Project on aggregating data from MOOC providers and secondary credentials, as well as assisting in counting credentials by region and population for the state of Alabama for its Success Plus Attainment Goal. He is also working on the State Incentives Database.
